The LRGM 1-2/ AM16 is a turnout grinding machine for the machining of the rail head which composes except the grinding unit also a generator so that no power cables has to be installed along the working site. The grinder can be easily railed in and out with a ramp of a rail vehicle, by crane or by an assembled lifter with steering function.

The turnout grinding machine has 2 grinding spindles with independent angular adjustment. They are driven by 7,5 to 15 kW frequency controlled electrical motors.

The LRGM 1-2/ AM16 turnout grinder can be used for removing of the rolling skin, the elimination of rail corrugations (grooves) and short waves on the rail head as well as for the re-profiling of the rail head. The grinder is efficient for grinding of turnouts, machining of railroad crossings, grinding of welding, machining of taper rail and for winning the transverse and longitudinal target profiles in short rail sections.

Rail-in time: approx. 10 minutes

Rail-out time: approx. 5 minutes

# Technical data of the rail grinder LRGM 1-2 /AM16

Length .....	2 x 2.070 mm
Breadth .....	1.750 mm
Hight .....	max. 1.850 mm
Weight .....	900 kg + 960 kg
Gauge .....	1000 to 1524 mm
Minimum curve radius .....	travelling: R15 m grinding: R20 m
Numbers of grinding motors .....	2
Power of grinding motors .....	7,5 to 15 kW per motor
Speed of cup stones .....	max. 5850 rpm, infinitely variable by integrated frequency converter
Max. grinding angle .....	-15° outside of the rail (field side) +70° inside of the rail (gauge side)
Operation .....	<ul style="list-style-type: none"> <li>- computer monitored grinding process</li> <li>- grinding in both directions</li> <li>- fixed and adjustable grinding programs</li> <li>- lifting and steering for road configuration</li> </ul>
Modification of grinding angles .....	electro mechanical control
Feeding mechanism for grinding stone .....	electro mechanical control
Horizontal grinding stone adjusting .....	electro mechanical control
Rail travel speed .....	10 km/h
Grinding speed .....	1,0 to 3,0 km/h
Maximum slope .....	70 ‰
Vacuum power for grinding dust .....	1,0 kW; volumetric flow rate 375 m <sup>3</sup> /h
Power of drive unit on rail .....	1,4 kW frequency converted 3-phase current motor
Electrical connection .....	400 V 32 A CEE connection; further connections of electrical machines are possible on the control board of the controlling system
Power supply .....	LRAM 16 generating set; 16 kW power output, 74 dBA
Lighting of working place .....	3 x 24V/70W halogen headlamp
Option .....	<ul style="list-style-type: none"> <li>- water tank (120l) with spray and cleaning system</li> <li>- particle-emission filter for exhaust gases</li> <li>- assembled lifter with steering function for road configuration</li> <li>- spark shields</li> </ul>
Protections .....
